

TO WHOM IT MAY CONCERN:

In the eighteen months during which The Royal Bahamas Police Force and Police College have been associated with Miss Linda Usher of MEMRIONICS in the Bahamas, we have found a vast improvement in the mental efficiency of our officers. They themselves think it is one of the most important courses they have ever done. They feel it has been of tremendous help in their skills as officers so much so that it has become a standard part of our curriculum at the Police College where all our recruit graduates found it has been of great help especially when sitting for qualifying examinations.

It is my feeling that this is "must-know" knowledge for officers, and anyone who has a professional interest in their career, who has a desire to be at their professional best in their field, I would recommend that they take the MEMRIONICS Course. From the experience of myself and our senior officers in association with MEMRIONICS, we have no hesitation in recommending this course for the improvement of professional performance of the members of any law enforcement body or for that matter, any profession, that demands mental efficiency and extensive storage of any detailed knowledge.

GERALD B. RTLETT – Commissioner of Police, OBE, QPM CPM

LARRY FREEMAN, Attorney, Miami, Florida

"Dr. Thomas Natiello, head of Health Administration at the University of Miami, unabashedly called the Course Phenomenal and said it had greatly sharpened his senses. Natiello said he had a feeling of personal comfort knowing that he could plan for work days ahead and he assured that he would have instant recall when he called on his memory to perform."

ALEX OAOUD, Vice Mayor, City of Miami

There is something about a course where there are no grades, no competition, where everyone is aware of the limitations we placed upon ourselves for so many years. You come out of it a different person. I learned how to never forget a face or a name, how to remember all my friends' telephone numbers, how to listen, how to observe, how to concentrate and much, much more. My fellow companions were just as delighted as I."

UGE CHIARIATO – Bulletin, Florida

"The Board of Nursing is pleased to inform you that you have been approved as a provider of continuing education offerings in Nursing."

DEPARTMENT OF PROFESSIONAL REGULATION Board of Nursing, Florida, U.S. A.

"People don't think much about their memory until they forget something. Then they pass it off jokingly or blame it on inheritance. This is so commonplace that to forget is considered normal. What many people don't realize is the finding that a poor memory stems from the practice of bad habits. Big corporations are enrolling top management personnel in the MEMRIONICS Course and marveling at the results. But they are not alone as high school students, clerks, insurance underwriters and sales people have found that MEMRIONICS has made the difference for them."

PEOPLE MAGAZINE ad BAHAMAS TV WEEKLY

"We recommend the Course highly to anyone in the Real Estate profession or for that matter, any profession."

LEEDS FASILIS & ASSOCIATES, REALTORS, Florida

As professionals, we know that knowledge is paramount. Regardless of our field, our ability to recall the vast amount of learned knowledge in a clear, concise manner is of vital importance. Memory can be a restrictive factor or a valuable asset, and something CAN be done to develop and improve it. The Association (of Professional Engineers) has recently evaluated a memory development course [MEMRIONICS] designed and presented by Graeme Bolitho - The Association recommends this program for your consideration and is pleased to cooperate with Acceleration Seminars in this venture."

THE ONTARIO DIGEST and ENGINEERING DIGEST,
THE ASSOCIATION OF PROFESSIONAL ENGINEERS

"My memory is very much improved."

MIKE BAXTER, City Editor, Miami Herald

"Although graduates have the technique to remember names of an audience of 200 people like the memory experts we see on TV, MEMRIONICS offers more than developing instant recall of names and stories. The objective of the Course is to make the mind a systematic storage facility. This is done by increasing the quality of the input that goes into the mind. Input is expanded by increasing listening ability, observation techniques, powers of visualization, and teaching people to relax.
